SECTION 7: MILESTONE PROJECT - 1, 1 hour 40 minutes, 9 parts

- **7/9 Milestone Project Help**
    - ○ **-> tic tac toe project tips**
        - ‣ **-> like learning to swim**
        - ‣ **-> make sure you understand the project scope / what we want**
            - • **in detail**
                - ○ -> create a function which will print the board
                - ○ -> check for a tie -> then write functions which begin gameplay
        - ‣ **-> break it down in steps to get there**
        - ‣ -> there are many different solutions / ways of doing the same thing
        - ‣ -> **making a program is a problem solving process**
        - ‣ **-> then look at the ways of getting there**
            - • -> technicalities -> documentation and trouble shooting
            - • -> **we write a lot of different functions and then combine them into the final result**
        - ‣ **-> then test the code to see if it works for edge cases**
        - ‣ **-> you can add extra things**
            - • -> change the colour of the board
            - • -> checking an input and then asking again
